Abstract

The recent international events had a large impact on the aviation sector because of several reasons. This documentation is all about the user interface wireframe, here the home page of our flight fare prediction project is explained with proper input.

1. Web Interface

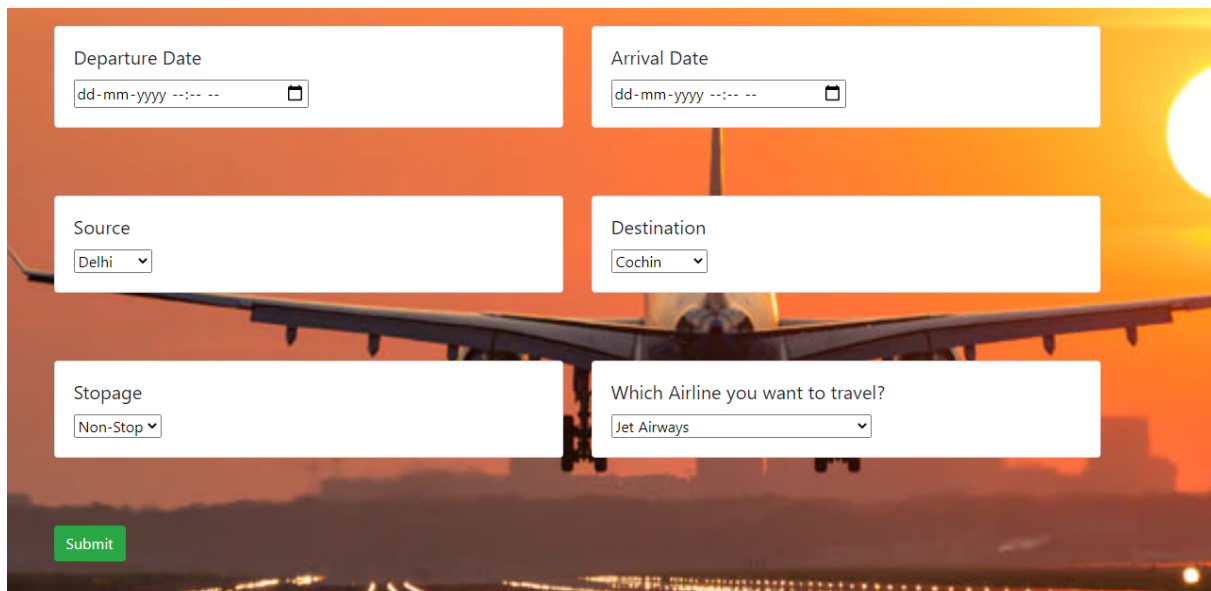

- Our web page is an interface where input is taken from the user and the prediction is displayed.

A wireframe of a flight booking web interface. The background is a sunset scene with an airplane in flight. The interface consists of several white input boxes with rounded corners. At the top left is a 'Departure Date' box with a placeholder 'dd-mm-yyyy --:-- --' and a calendar icon. To its right is an 'Arrival Date' box with the same placeholder and icon. Below these are two boxes: 'Source' with a dropdown menu showing 'Delhi' and 'Destination' with a dropdown menu showing 'Cochin'. Further down are 'Stopage' with a dropdown menu showing 'Non-Stop' and 'Which Airline you want to travel?' with a dropdown menu showing 'Jet Airways'. At the bottom left is a green 'Submit' button.

2. User Input

- Whenever the user hits our url, they first see the user input page here they have to provide the information like:
 - Every user input has its own dropdown where the user can select their input.
 - After providing the required input and pressing the submit button, the page refreshes and displays the output

A wireframe of a flight booking web interface, identical to the one above. It features a sunset background with an airplane. The form includes 'Departure Date' and 'Arrival Date' fields with calendar icons, 'Source' (Delhi) and 'Destination' (Cochin) dropdowns, 'Stopage' (Non-Stop) and 'Which Airline you want to travel?' (Jet Airways) dropdowns, and a green 'Submit' button.

3. Result Page

After the user hits the submit button the page gets refreshed and the results are being displayed in the highlighted area in the above frame.

The user can refill all the inputs in the same page and get the results in the same way.

Departure Date
dd-mm-yyyy --:-- --

Arrival Date
dd-mm-yyyy --:-- --

Source
Delhi

Destination
Cochin

Stopage
Non-Stop

Which Airline you want to travel?
Air India

Submit
